PROFESSIONAL SUMMARY

Dedicated Front-end Developer with expertise in React.js and modern JavaScript. Proven ability to build responsive web applications with seamless API and database integrations using Supabase and Firebase. Committed to high-quality UI/UX.

TECHNICAL PROJECTS

Cakes Villas – MERN Stack Order System

[GitHub Repository](#)

- Engineered a full-stack cake ordering platform with a secure Admin Dashboard for order management.
- Implemented dynamic routing and state management using React hooks for efficient data flow.

Inferno Grill – Fast Food Delivery Platform

[GitHub Repository](#)

- Developed a modern delivery interface with real-time data sync using Supabase integration.
- Focused on mobile-first design and optimized performance for a smooth customer journey.

Expense Tracker – Real-time Finance App

[GitHub Repository](#)

- Created a finance management tool utilizing Firebase for real-time data persistence.
- Designed interactive transaction histories and secure user authentication flows.
